**PROJECT REPORT**

With reference to the proposal on the determination of total essential oil content of Palmarosa, we have studies on the given plant material.

Details of plant material and our findings are given below:

Plant material	: Fresh aerial parts of <i>Cymbopogon martini</i>
Common name of plant	: Palmarosa
Family	: Gramineae
Plant description and uses	: Essential oil contains mainly geraniol (>80%) and other Geranyl acetate and linalool. Medicinally the volatile oil is used as a remedy for joints pain, anthelmintic and skin diseases.
Locality	: Given plant materials was collected from the locality of Chopda, District-Jalgaon (Maharashtra)
Method of extraction	: The essential oil was isolated by steam distillation method.
Volatile oil content	: 0.66%v/w

Subject: Permission for Industrial Training for our teaching faculty.

Dear Sir,

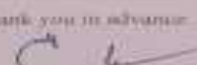

With reference to above subject and our MoU, On behalf of the management, I take this privilege to seek your permission about the proposed industrial visit to your industry on Sunday, 24/07/2021. There are a total number of 06 staffs who are in our college who wish to take a view about your industrial process and facilities. Further it is also requested that your staff may also be made available to explain in detail about your processes.

Our academic curriculum focuses on engaging students in practical experiences to observe the implementation of what they are taught in college. You will agree that this will be a very good experience for staffs that can learn practically about the working of an industry and this will help students to develop in future career and job prospects.

We are sure that this will be a great opportunity for your industry to help young generation to learn about industrial sector wherein you are contributing in much worth to its credibility.

Please allow us to conduct an industrial visit in your company and meet your skilled employees. Kindly contact to Dr. Kiran D. Patil 9329004867 if there are other requirements for the visit.

Thank you in advance.

Principal and Project Guide.

We visited Polymed Pharma Jalgaon on 4th and 5th of Jan. in group of 5 members. This visit was for the prime focus on Quality Assurance department.

Right from Raw material Section, Manufacturing Section, Filling & Labelling to finished products store was observed. All QA aspect was explained successfully by the company members.

**Telemax Injection Filling Process:**

1. There was two room, in one room prepared solution filled in up to 300ml. vessel in one room filling of bottle
2. Every personnel present in room was fully covered to avoid contamination
3. In prepared solution vessel Nitrogen gas is supplied to maintain pressure to pass solution in the constant pressure to filling assembly
4. Between the vessel & filling machine. There was a knob, which contain the filter paper in it which Filter the solution and pass to filling machine.
5. Filling machine is set to 20 ml, 30 ml 50 ml as per need.
6. One can fill bottle simply by placing it to opening and then pass the filled bottle to conveyer belt.
7. Further filled bottles openings/ mouth. Closed and sealed by other person
8. Sealed bottles pass to other section for optical checks: It was done by simply seeing the filled bottles in 2 diff background ie white & black black particle will be seen in white background & vice versa).
9. If any particle detected in optical check in bottle then bottle will be taken out & if more than 5-7 bottle then whole batch is cancelled.
10. After checkup optical bottles are labelled & kept in box which also labelled & kept in box which also contain label, mfg. date, expiry, price, etc.

Integrating Entrepreneurial Skills into the Curriculum to  
Increase the socio economic status in Rural Area

➤ **Goal :** To design, construct and frame the Solar Dryer and Foldable solar dryer.

➤ **Objectives :** After successfully demonstrating the pilot plants, solar drying technology is expected to proliferate throughout local rural area benefiting the larger population of farmers augmenting their meager income by selling good quality dehydrated products.

➤ **We accomplished this goal and Objective by completing the following objectives :**

- Designing and Constructing the selected solar dryer system.
- Recommending interactive and engaging activities for the students introducing entrepreneurial skills.
- To demonstrate and evaluate technologies related to protect high value Leaves, Fruits, Food processing products, Dehydrated products in Regional context of Satpuda Region.
- To conduct studies on their post-harvest handling & marketing.
- To transfer the technological packages developed under the project to the farmers of the state through capacity building by way of training and demonstration.

### MoUs with BARC for Technology Transfer

#### ➤ Solar Dryer :

##### ▪ APPLICATIONS :

- The solar dryer in the capacity of 25 kg fresh food per batch is used for drying tomato slices, brinjal slices, potato wafers, green chillies, apricot pieces, mango slices, grapes, fish etc. Value addition on non-marketable produce by farmer/rural techno preneur in rural sector itself.

##### ▪ ADVANTAGES :

- By use of this dryer, the drying process is made 1.5 times faster than normal sun drying procedure resulting in substantial weight reduction.
- It has no adverse effect on environment.
- Product is hygienic.

#### ▪ APPLICATIONS :

- The foldable solar dryer in the capacity of 10, 25 & 100 kg is used for the preparation of raisin, drying of grapes, onion, mango pulp, green leafy vegetables, Amla, jack fruit pulp, ginger, green pepper, herbal medicines etc. More than 50 varieties have been dried using these dryers at various AKRUTIs.

##### ▪ ADVANTAGES :

- By use of this dryer, the drying process is made 5 times faster than normal sun drying procedure resulting in substantial weight reduction. 100 kg of grapes can be converted to 25 kg of raisin. It has no adverse effect to environment.
